EDUCATION

Purdue University West Lafayette, IN
Bachelor of Science in User Experience Design, Minor in Psychology,
Certificate in Collaborative Leadership - 3.98 GPA

EXPERIENCE

Microsoft Redmond, Washington
Product Designer I August 2026-Current

- Shape enterprise product experiences designing workflows and features that help internal and external users navigate complex international business, legal, and compliance scenarios.
- Partner with engineers and PMs to design and implement product enhancements in production codebases, leveraging AI-assisted workflows to accelerate iteration and streamline design-to-development handoff.
- Facilitate workshops with global users and cross-functional stakeholders, synthesizing research and feedback into actionable recommendations that influence product strategy and experience improvements.

Microsoft Redmond, Washington
Product Design Intern May-August 2025

- Developed the brand identity for Trust Copilot for Enterprise Cloud, leveraging AI tools to accelerate design and establish a cohesive product narrative; adopted by 10+ teams and scaled across Microsoft 365.
- Translated 5+ regulatory and security requirements into clear design flows and dashboards in partnership with PMs, engineers, and compliance stakeholders, improving usability for complex compliance workflows.
- Executed end-to-end design for audit and compliance workflows, delivering 25+ high-fidelity screens that enhance accessibility, reduce friction across tools, and support 10000+ internal and external users globally.

Apiture Wilmington, NC (Remote)
UX Design Intern December 2024-May 2025

- Redesigned 5 key mobile banking workflows by translating complex desktop features into intuitive mobile UI, using insights from Pendo analytics, Usertesting.com, and stakeholder feedback.
- Reworked the mobile design system in ZeroHeight, documenting a library of 30+ components and aligning it with desktop standards; improved accessibility guidance and reduced design–dev friction across teams.
- Streamlined design and research workflows by leveraging AI tools for documentation and synthesis, while collaborating with engineers in Jira to align designs with Agile development cycles.

United Airlines Houston, TX
Product Design Intern May-August 2024

- Conducted 20+ user interviews, surveys, and field observations at the In-Flight Training Center to uncover key pain points across trainee and staff experiences.
- Designed a roommate matching system to standardize living agreements in partnership with HR and operations, reducing onboarding friction and improving trainee satisfaction by 60%.
- Revamped flight attendant training materials in collaboration with instructors and brand teams, increasing usability by 70% while aligning content with United's design system and global aviation regulations.

Keylime Interactive August-December 2024
Lead UX Researcher, Project

- Led end-to-end UX research and design for an AI-powered budgeting assistant, conducting 30+ user sessions and 4 expert interviews to identify motivation gaps, while leveraging AI tools to streamline workflows and cut project time by 40% without compromising quality.
